

## QUICK LOCKING SYSTEM

Fluid Line Technology is proud to introduce our new Single Use Technology line of **Quick Locking Fittings**.

These fittings are crafted in solid thermoplastic piping material with sanitary flanges to approach the combined strength, working temperature and chemical resistance to provide simple and clean fluid management solutions for single use system. Its compact design allows Fluid Line to build lightweight piping and instrumentation systems with minimal space requirements.

Components are manufactured from certified USP Class IV materials.

**Quick Locking Fittings** are available in various port configurations like elbows, tees, reducers, crosses, etc. in sizes from 0.25" to 1.50".

## Features and Benefits

- High-pressure
- High-temperature durable construction
- USP Class VI certified material
- Fully autoclavable
- Gama stable
- Smooth internal surface
- Various sizes available
- Various configurations available
- Good for all cGMP manufacturing
- Quick assembly, no hose barbs/wraps
- Uses: CIP system
- Uses: TFF system
- Uses: Chromatography system
- Light weight and user friendly
- No substructure required
- Fully customizable
